PROFILE

A Computer Science Engineering Graduate (2025) with a strong foundation in full-stack development using Core Java, Spring Boot, React.js, and MySQL. Skilled in designing and developing scalable, efficient, and user-friendly web applications. Proficient in problem-solving, writing clean code, and collaborating in team environments. Passionate about learning emerging technologies and contributing to real-world software solutions.

EDUCATION

Dr. T. Thimmaiah Institute of Technology

Bachelors of Engineering in Computer Science – CGPA: 8.05

Karnataka, India

2021 - 2025

Sri Bhagwan Mahaveer Jain College

Pre - University Education – Percentage : 71

Karnataka, India

2019 - 2021

Skills

Frontend	HTML5, CSS3, JavaScript, React.js
Backend	Core Java, Spring Boot, Hibernate, JDBC, RESTful APIs, Java Servlets
Databases	MySQL
Tools & Platforms	Git, Apache Tomcat
Cloud & DevOps	AWS

INTERNSHIP & TRAINING

TAP Academy | Java Full Stack Developer Trainee

Sep, 2025 – Feb, 2026

- Gained hands-on training in Core Java, Spring Boot, Hibernate, and MySQL.
- Learned frontend technologies including HTML5, CSS3, and JavaScript.
- Understood concepts of RESTful APIs and full-stack application development.

Rooman Technologies | Application Development in Web and Mobile

Sep, 2024 – Feb, 2025

- Gained exposure to full-stack development concepts by working on web and mobile application projects.
- Learned the basics of how the MERN stack (MongoDB, Express.js, React JS, Node.js) is used in real development.
- Assisted in simple tasks such as UI updates, testing, debugging, and data handling.
- Collaborated with the team using Git and followed Agile practices.

PROJECTS

Student Management System

Dec, 2025 – Feb, 2026

React JS, Core java, Servlets, JDBC, MYSQL, HTML, CSS, Apache Tomcat

- Built a full-stack student management web app with React.js (UI) and Java Servlets (backend).
- Implemented CRUD operations using JDBC with MySQL database.
- Created responsive forms and pages using React components and CSS.
- Connected React frontend to Java REST APIs for seamless data communication.
- Deployed and tested the application on Apache Tomcat

Crop Yield Prediction using ML

Nov, 2024 - Feb, 2025

ML Model, Flask, Python, CatBoost, LSTM, XGBoost

- Developed a crop yield prediction system using ML algorithms such as XGBoost, CatBoost, and LSTM.
- Performed data preprocessing and applied PCA/SVD for dimensionality reduction to improve model performance.
- Achieved 95% prediction accuracy evaluated using R^2 score and RMSE.
- Built a responsive Flask web application that allows users to predict crop yield based on input parameters.

CERTIFICATES

Cloud virtual Internship - Amazon Web Services (AWS)

Application Developer Web & Mobile - Rooman Technologies

Java Full Stack Developer – TAP Academy
